Dear Applicant:

Thank you for your interest in applying for a grant under the Office on Aging's Wellness Center Competitive Grant program. This letter highlights a few items in the application package that will be important to you in applying for a grant. You are encouraged, however, to review the entire application package carefully before preparing and submitting your application. Please note the following provisions:

1. Eligible applicants include nonprofit and for profit organizations, although for-profit organizations may not include profit in their grant application.
2. In an effort to facilitate an effective application evaluation process, all applicants must adhere to the program narrative limitation of 35 pages. Applications that exceed this number will not be reviewed and will be returned to the applicant. To further expedite the reading process, applicants should also follow the format for Section III – Proposal Format - that is provided in the application package.
3. Currently funded Office on Aging Senior Wellness Center grantees should note that prior performance will be assessed and considered in final funding determinations.
4. All applicants must supply a D.U.N.S. number issued by Dun & Bradstreet.
5. All applicants **must provide a cash match of 15%**. In-kind contributions are welcomed, but will not be considered as a part of the cash match.
6. The Office on Aging Senior Wellness Centers are located at:

Ward 4 – Hattie Holmes Senior Wellness Center
324 Kennedy Street N.W.
Washington D.C. 20011

Ward 5 – Model Cities Senior Wellness Center
1901 Evarts Street, NE
Washington, D.C. 20018

Ward 7 – Washington Senior Wellness Center
3001 Alabama Avenue, SE
Washington, DC 20020

Ward 8 – Congress Heights SWC
3500 Martin Luther King Jr. Avenue

7. The facilities are owned by the District of Columbia. The successful applicant will be responsible for all routine maintenance including but not limited to fixture replacements.
8. All applicants must supply a Certification from the District of Columbia Office of Tax and Revenue that their agency is compliant with District of Columbia tax requirements.
9. The successful applicant will write a proposal that addresses evidence based, comprehensive, integrative approach to senior health and wellness that result in measurable outcomes showing improvements in participants' health and lifestyle behaviors. Evidence-based programs used must be approved by DCOA. For example, programs combining calisthenics, isometric and stretching exercises combined with dance enable seniors to develop muscle strength and endurance as well as flexibility and cardio-pulmonary fitness (www.projectenhance.org). Weight training is essential to optimal physical health for seniors as it strengthens muscles and bones and increases the strength of ligaments and tendons so that less stress is placed on joints. Creative presentations on disease prevention, health maintenance, and medication management stimulate recipients to change their lifestyle behaviors and diet habits. Combining sound/balanced, nutrition in the lives of seniors with exercise and weight training is essential to the maintenance of physical strength, mental acuity, proper organ function, and sensory perceptions, such as vision, smell, touch, and taste.
10. The Enhance Fitness Program is the evidence-based model that DCOA is requiring to be included at each wellness center as a standardized core fitness component in the wellness center curriculum. The purpose of Enhance Fitness Program is to provide seniors with an effective research-driven physical activity program with the goal to improve their overall functional fitness and well-being. This program focuses on stretching, flexibility, balance, low impact aerobics, and strength training exercises. Applicants are expected to address the Enhance Fitness program and include it in their proposed core curriculum. Applicants should use other evidence-based programs for other activities of their wellness program.
11. The successful applicant will show evidence of one or more partnerships with hospitals or other organizations specializing in health care. The health care partner should provide services that include screening for diseases such as diabetes, hypertension, cardiovascular, HIV/AIDS, and prostate and breast cancer as well as providing prevention information, health education, and medication management to the participants of the wellness center.

12. All applicants must show evidence of staffing that includes a full-time wellness center director, a nutritionist, and a fitness coordinator, supported by other health, wellness and outreach staff and consultants.
13. All applicants must have a letter of support from the Commissioners on Aging and/or the Chair of the Mini-Commission on Aging in the applicable ward(s). Contact information for those Commissioners and Mini-Commission chair is attached. Other letters of support are not necessary and will not provide any competitive weight to the application.
14. All applicants must supply a current Certificate of Incorporation issued by the District of Columbia Department of Consumer and Regulatory Affairs showing that the organization is in good standing with the DC government.
15. All applicants must supply Minutes from the Board of Director's meeting, signed by the President or Secretary of the Board, in which the Board authorizes the applicant to submit an application for funding to the Office on Aging or certification from the Board, signed by either the President or Secretary, giving the Executive Director authority to apply for grants.
16. All applicants must submit a copy of the agency's most recent audited financial statement.
17. The successful applicant is expected to participate in community meetings for purposes of outreach, crime reduction, emergency preparedness, and collaboration.
18. The New Communities Initiative is a comprehensive partnership to strengthen families living in distressed neighborhoods in Washington, DC by fighting concentrations of violent crime and poverty. A New Community is a healthy mixed-income community with integrated public facilities and services that offer families better housing, employment and educational opportunities. The successful application will be expected to participate in the development of any New Communities that are established within each Ward.
19. Aging & Disability Resource Center (ADRC) is a federally-supported entity whose purpose is to coordinate services and assistance for older adults and younger persons with disabilities and it complements other long-term care system change activities designed to enhance access to community living. It is a collaborative effort mobilizing both public and private sector resources to deliver effective long-term care support for providers and customers in a single coordinated service delivery system. The DC ADRC serves as a "one stop shop" helping customers and their families simplify access to needed information, services, and assistance. The successful applicant will be expected to cooperate with and participate in the ADRC processes and activities, provide customers with wellness services and referrals to other appropriate information and service providers within the ADRC framework.

20. The Office of Aging strongly supports and encourages the utilization of local and small businesses certified through the Department of Small and Local Business Development's Certified Business Enterprise program. The successful applicant is encouraged to utilize the resources of the Department of Small and Local Business Development, including the *Business Center* found on DSLBD's website (<http://dslbd.dc.gov>) as a resource for identifying CBEs and to publish contracting and procurement opportunities.

Applications sent by mail must be mailed in time to allow the application to reach the D.C. Office on Aging by the deadline date. The application must be delivered by hand/courier service **no later than 5:00 p.m., EDT**, on or before the deadline date. Detailed mailing instructions are provided in Section VI - Instructions for Transmitting Application. Applications submitted late will not be accepted. The Office on Aging is required to enforce the established deadline to ensure fairness to all applicants. No changes or additions to the applications will be accepted after the deadline date.

INSTRUCTIONS FOR COMPLETING THE STANDARD OUTCOME MEASURES FORMS

Each grantee providing the services listed on the previous pages, must include the relevant **Standard Performance Goals and Outcome Measures Forms** in its grant application. Standard Performance Goals and Outcome Measures are required for **each service that appears on a separate service line in the grantee's Office on Aging grant application budget.** The Performance Goals and Outcome Measures Forms are found on the following pages.

The grantee must complete the applicable forms by adding the:

- Name and title of the responsible person
- Office on Aging funds (do **not** include the grantee match) the grantee has budgeted for the services that comprise the activity

Definitions

Target Results: The target results are what the Program is working to achieve during the fiscal year.

Actual Results: The actual results are what the grantee achieved during the fiscal year based on actual client statistics.

Outputs and Demands: Outputs and demands are the statistics the grantee records to determine whether the target results have been met.

Responsible Person: The name and title of the person or people responsible for ensuring that the target results are met.

FY 2009 Budget: The amount of Office on Aging funds budgeted for the services comprising this activity.

Submission of Outputs, Demands, and Actual Results Data to the Office on Aging

The demands and outputs, which allow a grantee to calculate actual results, are based on fiscal year 2008 data. Therefore, the demands, outputs and actual results are recorded on the forms once the fiscal year has ended and client data has been collected and tabulated for the year. ***The completed forms must be sent to the Office on Aging at the conclusion of the fiscal year. Grantees will be notified of the date that the forms are due. Additionally, there may also be monthly reporting requirements, but grantees will be notified at a later date.***

Putting Systems in Place to Track Results

The system for using relevant measurement tools, collecting and recording output and demand data, and tracking results, must be in place at the beginning of the fiscal year, so that the data will be available to determine whether the target results were met for the year. Progress should be monitored periodically. Data and worksheets must be maintained and made available to Office on Aging staff, upon request, for monitoring purposes.

Recording Outputs and Demands

Some outputs and demands, specifically the number of clients receiving a particular service, are provided by Georgetown based on the client rosters that the grantee submits. Other outputs and demands, based on the number of participants screened and reassessed, the results of screenings and reassessments, the length of time a client has received service, and the results of customer surveys and training evaluation forms must be tracked by the grantee.

The nutrition performance measures require screenings and follow-up screenings. Nutrition follow-up screenings on high risk clients should occur at six month intervals. All clients receiving reassessments within the fiscal year should be included in the calculations to determine what percentage of clients had improved nutrition or healthy lifestyle scores upon reassessment.

Service longevity spreadsheets required for most in-home and continuing care service performance measures must list the clients in the program and track their service use during the fiscal year. Clients who receive service throughout the fiscal year are counted as having remained in their home for the year. Clients, who stop service ***temporarily*** during the year for situations such as hospitalization, may still be counted as remaining in their homes.

Customer surveys, required by most community-based service performance measures, must be completed prior to the end of the fiscal year allowing enough time for responses to be received and tabulated and included in the calculations to determine the actual result.

Calculating Target Results

Example Nutrition Services: 5% of seniors identified as being at high nutritional risk will experience an improvement in their nutritional status based on an improved nutritional risk score.

- **Demand**
 - 250 participants at high nutritional risk received follow-up screening (will be lower than the number assessed at high risk because some may have dropped out of the program or follow-up screening was not possible for a variety of reasons)
- **Output**
 - 50 participants who received follow-up screening had an improved nutritional risk score (improved by one or more points)
- **Actual Result Calculation = output divided by demand, i.e.,**
 - $50/250 = 20\%$ improved
- **Actual Result 20%**

Example Day Care: 50% of seniors receiving day care services will remain in their homes for one year.

- **Demand**
 - 100 participants received day care services
- **Output**
 - 50 participants received services for one year (participants who stop services **temporarily** may be counted)
- **Actual Result Calculation = output divided by demand, i.e.,**
 - $50/100 = 50\%$ remained in their home for one year
- **Actual Result 50%**

Example Community-based Services (i.e., Congregate Meals, Nutrition Education, Nutrition Counseling, Recreation, Counseling, Transportation to Sites): 10% of participants will report that the services enable them to maintain an active and independent lifestyle.

- **Demand**
 - 75 people responded to this question on the customer survey.
 - **Output**
 - 70 respondents reported the services enabled them to maintain an active and independent lifestyle.
 - **Actual Result Calculation = output divided by demand, i.e.,**
-

- 70/75=93% reported that the services enabled them to maintain an active and independent lifestyle.

- **Actual Result 93%**

Target Results: The target results are aimed at assessing improvement of all clients who have participated at the Wellness Center or Bodywise for at least one year during FY 2009.

Actual Results: The actual results are what the grantee achieved during the fiscal year based on actual client statistics and cover both the objective Healthstyle or similar assessment results and the client survey.

Measurement Tools: The measurement tools are the *Healthstyle: A Self Test for Seniors*, or equivalent health lifestyle assessment tool, used by the Wellness Centers to determine the health habits of participants and the customer survey. Wellness Center participants are to be reassessed at six-month intervals. The customer survey must *include a common question regarding whether a client's participation in the program increased their awareness of healthy behaviors which led them to adopt one or more healthy habits.*

Outputs: Outputs are the statistics the grantee records to determine whether the target results have been met.
